

DUAL ENROLLMENT

Dual enrollment at SJR State provides eligible accelerated high school students the opportunity to simultaneously earn college credit while earning credit toward a high school diploma. Early Admissions and Collegiate High School are forms of dual enrollment. Public and private high school students, as well as home-schooled students, are served by this program that was created by Florida Statute 1007.271 and is governed by state law.

REASONS TO CONSIDER DUAL ENROLLMENT:

1. Dual enrollment saves money. Tuition and lab fees are free for all dual enrollment students. Textbooks are free for all public school students.

2. Dual enrollment saves time. Students can shorten the time necessary to obtain a college degree since classes count both for high school credit as well as college credit. As a result, students can reduce their course load per term when they attend college full time, or possibly earn their college degree in a shorter amount of time.

3. Dual enrollment eases the transition from high school to college. Students can “test the waters” of college learning, helping improve the transition from high school to college.

To be qualified for SJR State’s dual enrollment program, students must have a 3.0 unweighted high school grade point average; acceptable test scores (ACT, SAT, CPT, or P.E.R.T.); must be classified as a secondary student and have demonstrated academic, social, and emotional maturity to ensure success in college-level study. Eligible secondary student with a 2.0 unweighted grade point average, acceptable test scores, and a recommendation from their high school principal

and guidance counselor are eligible to participate in SJR State’s dual enrollment vocational certificate programs.

Classes are offered on SJR State’s Orange Park campus, Palatka campus and St. Augustine campus. Additionally, some classes are available online, and others are even held at local high schools. Students can take dual enrollment courses that will lead toward the A.A. or A.S. degree or college credit certificate.

Dual enrollment credits are transferable, especially to Florida state colleges and universities, due to Florida’s Common Course Numbering System and the statewide articulation agreement. For out of state and private schools, students should check with the individual schools. Grades earned in dual enrollment courses will be on, and remain on, students’ college transcripts. Credits earned toward a vocational certificate program are not transferable for college credit.

Students interested in dual enrollment should see their high school’s designated dual enrollment contact to determine if they qualify for the program. From their high school’s designated dual enrollment contact, students can obtain a dual enrollment admissions form that will need to be completed. In addition, students need to submit test scores (ACT, SAT, or PERT) with the dual enrollment admissions form or mark set-up CPT/PERT on the admissions form. The final step is meeting with the designated high school contact to discuss appropriate course load and selection.
