

FLORIDA SCHOOL OF THE ARTS

ST. JOHNS RIVER STATE COLLEGE

PURPOSE

Florida School of the Arts is dedicated to the premise that both intense, individualized instruction and practical “hands-on” experience are essential to the full development of a student’s creative abilities. As part of public education in the state, Florida School of the Arts provides comprehensive artistic training appropriate to each student’s talent, enabling each student to acquire the knowledge, skills, and appreciation of the chosen arts discipline required for employment in the arts profession. Students receive professional art instruction and rigorous training from the beginning of enrollment. As a professional arts school, Florida School of the Arts provides a learning environment in which students are expected to adhere to standards of professionalism and academic excellence.

THE SCHOOL

Florida School of the Arts, established in 1974 by the Florida State Board of Education, specializes in preparing students for successful careers in visual and performing arts.

Florida School of the Arts is located on the Palatka campus and is part of the academic and administrative structure of St. Johns River State College. It is administered by a dean under the general supervision of the St. Johns River State College District Board of Trustees and the College president. The school, however, is statewide in scope, and has its own arts facilities, faculty, administrative staff, mission statement, and curricula specific to each degree program. This information can also be obtained on the school website at SJRstate.edu/floarts.

The academic year at Florida School of the Arts consists of a fall term, spring term, and summer session A. Enrollment is recommended during each of the three terms.

ADMISSION

Admission to Florida School of the Arts is by audition or portfolio review only. Separate application paperwork and procedures are also required by St. Johns River State College because all Florida School of the Arts students must also be admitted to St. Johns River State College and are responsible for compliance with all college policies and procedures.

The application for Florida School of the Arts is available for submission from the website at SJRstate.edu/floarts. The application fee of \$30 is deferred until an applicant is accepted into a Florida School of the Arts program and registers for classes. As part of completing the application, a potential student will select an audition or portfolio review date. The following additional paperwork for Florida School of the Arts will then be due before the selected date: an arts resume, a statement of purpose, two letters of recommendation and high school and/or college transcripts current at the time of the scheduled audition or portfolio review. We will accept paperwork by mail to Florida School of the Arts, Attention: Admissions Coordinator, 5001 St. Johns Avenue, Palatka FL 32177 or email to FloArtsAdmissions@SJRstate.edu.

Specific audition and portfolio requirements differ by discipline. They are available online at SJRstate.edu/floarts, or by mail or email by request. For the performing arts programs (Acting, Musical Theater, and Dance), applicants are required to schedule an audition on one of the designated dates. For the production design programs (Costume Design, Scenic/Lighting Design and Stage Management), applicants are required to schedule a portfolio review on one of the designated dates or call (386) 312-4300 or (386) 312-4304 to make other arrangements. For the visual arts

programs (Studio Art, Graphic Design/New Media, Photography and Animation), applicants may choose to review in person on one of the designated dates or they may submit a portfolio digitally.

Admission requirements and procedures for St. Johns River State College may be found at SJRstate.edu.

FINANCIAL AID

College students admitted into Florida School of the Arts programs are eligible for all college financial aid programs. Among these are FloArts Talent Scholarships, college student worker programs, loan programs, government grants, and special scholarships from the state and private funds. Consult the financial aid section of this catalog for detailed information.

HOUSING

Students are responsible for securing their own housing. The office maintains a contact list to assist those students seeking roommates for each fall term.

REQUIRED COLLEGE COURSEWORK

All students must complete a minimum 25% of all credit hours required for graduation through the Florida School of the Arts and/or St. Johns River State College.

FLORIDA SCHOOL OF THE ARTS PROBATION AND SUSPENSION POLICIES

Florida School of the Arts students are subject to the academic regulations of St. Johns River State College and Florida School of the Arts in regards to probation and suspension.

Students on full status are eligible to participate in all Florida School of the Arts classes and extracurricular activities. To remain on full status, a student must maintain a cumulative grade point average of 2.0 as well as an arts grade point average of 2.5.

SPECIALIZED ACCREDITATION

St. Johns River State College is an accredited institutional member of the National Association of Schools of Art and Design (NASAD).

DEGREE PROGRAMS

FLORIDA SCHOOL OF THE ARTS

The Associate in Science Degree: Each Florida School of the Arts student must complete a planned A.S. degree program that combines foundational and specialized coursework in the student's artistic discipline with prescribed general education requirements for communications, humanities, mathematics, natural science or social science.

ASSOCIATE IN SCIENCE DEGREE

- PERFORMING ARTS AND PRODUCTION/DESIGN
 - Acting
 - Dance
 - Musical Theater
 - Theater Technology
 - Scenic/Lighting Design and Technology
 - Costume Design and Technology
 - Stage Management
- VISUAL ART
 - Studio Art
 - Graphic Design/New Media
 - Photography
 - Animation

minimum the completion of at least three years of formal schooling. Additional documentation may be requested at the discretion of the Vice President for Academic Affairs.

Native speakers without proof of foreign education have the following options:

- If the language is currently offered by St. Johns River State College, the student may petition to complete a campus-based proficiency examination by a qualified SJR State foreign language faculty member.

- If the language is not currently offered by St. Johns River State College and there are therefore no faculty on staff who can evaluate that language, students have several options:

- submit proof of proficiency in the language through a recognized, standardized test such as CLEP;
- provide alternative documentation concerning their language proficiency to be approved at the discretion of the Vice President for Academic Affairs, or
- complete the foreign language requirement in another language.

For more information or a copy of the foreign language coursework waiver petition, please see your academic advisor.

The Associate in Science + Associate in Arts degree option: Any Florida School of the Arts student may complete a dual degree *pathway* by fulfilling the additional general education requirements for the A.A. degree over and above those already required as part of the A.S. degree.

The College Credit Certificate in Stage Technology: The Stage Technology certificate is generally earned by students who are pursuing the A.S. in Theater Technology with a specialization in Scenic/Lighting Design and Technology or Costume Design and Technology. It marks successful completion of 17 credit hours of coursework in that area. It does not require any general education courses. Often, students in our Theater Technology programs earn this certificate during their first year of that two-year program. Stage Management students who have completed the specified 17 credit hours may also be awarded this certificate.

STATE UNIVERSITY SYSTEM - FOREIGN LANGUAGE REQUIREMENT

The Foreign Language Competency Requirement can be met by completion of two years of the same high school foreign language or completion of two semesters of the same college level foreign language or documented proficiency of a foreign language. If you did not complete two years of the same high school foreign language and do not have documented proficiency of a foreign language, you will need to complete two semesters of the same college level foreign language in order to graduate with your Associate in Arts degree. These foreign language credits will count towards your required general education elective and/or baccalaureate transfer program prerequisites/elective credit hours. Please check with your Academic Advisor or Workforce Advisor if you are unsure whether you already meet this requirement.

Native speakers of languages other than English may petition to waive the foreign language coursework requirement.

Native speakers who are able to demonstrate they completed part of their education in a non-English educational system should complete and submit the foreign language coursework waiver petition with proof of enrollment in a foreign language school in which the language of instruction was not English for a specific, prolonged period of concurrent academic years, generally to include at a

SPECIALIZATION AREAS

FLORIDA SCHOOL OF THE ARTS

PERFORMING ARTS AND PRODUCTION DESIGN

The Theater and Entertainment Technology curricula offer students well-rounded, creative, and practical training in dance, musical theater, acting, scenic/lighting design and technology, costume design and technology, and stage management. The department's accelerated programs, along with their production schedules, allow incoming students immediate "hands-on" experience. Upon program completion, performance students have received an excellent foundation to either begin their professional careers or to continue on to a university or conservatory for advanced level training.

The Florida School of the Arts Performing Arts and Production Design program has six disciplines of study:

ACTING: A Florida School of the Arts acting major has the unique opportunity to audition and perform in a number of productions each year, including four main stage and other productions. Students receive practical, creative and insightful instruction in the classroom and on the stage. This intensive training, consisting of the development of the voice, body, gesture, and creative imagination, enables the actor to work in a myriad of theatrical styles from the classics to contemporary comedy, drama and musicals. In Acting for the Camera, students adapt those skills for the specific demands of television and film. Students also gain valuable instruction in all phases of theatre production, including stage construction, lighting, sound, costume design/construction, make-up and stage movement. Upon completion of the program, acting students are prepared for entry-level positions in the acting profession or to proceed to four-year university or conservatory programs to further their training and study.

DANCE: This progressive dance program consists of intensive technical training in the areas of ballet and contemporary dance. Students also study various stylized forms of dance including jazz, musical theater, tap and ethnic forms. As part of the students' creative development, course work is required in improvisation and choreography. Students also have the option to choose from a variety of dance electives to develop their craft and explore practical applications in the field of dance through course work in dance history, dance ensemble performance work and a conditioning class. Upon graduation, the student is prepared for current career choices in professional dance companies, the entertainment industry or to continue on to a conservatory or four-year bachelor of fine arts institution.

MUSICAL THEATER: Musical theater majors at Florida School of the Arts receive professional training in three core areas: music/singing, dancing, and acting. The music component of the degree requires that students study and pass music theory, sight singing, voice, and piano. For the dance component, students are cross-trained in ballet, jazz, and tap techniques. For the acting component, the coursework consists of practical, hands-on training to develop the actor's voice, gesture, body, and creative imagination. As part of the acting component, students also gain valuable instruction in all phases of theater production, including stage design/construction, lighting, sound, costume design/construction, makeup, and stage movement. Upon completion of this intense curriculum, graduates may go directly into a career in musical theater or the entertainment industry.

SCENIC/LIGHTING DESIGN AND TECHNOLOGY: The scenic and lighting design curriculum at Florida School of the Arts is unique in that it provides students practical stage experience balanced between classroom and laboratory instruction. There is a strong emphasis in practical skills, creative problem solving, and artistic

collaboration, as well as strong foundational development of knowledge in the equipment, materials, and skills practices of the theatre production industry. The program requires students to develop and present major projects in scenic design, lighting design, and accompanying technologies as well as other contributing areas, including scene painting, sound, drafting for theatre, and stage properties. These projects ultimately contribute to a well-developed and versatile portfolio. Upon successful completion of the degree, students are prepared to continue their education in scenic design, lighting design or technical direction, or any other design/production practice or to seek employment in professional theatres, touring companies or professional scenic or lighting shops.

COSTUME DESIGN AND TECHNOLOGY: The costume design curriculum at Florida School of the Arts begins with an examination of the fundamental techniques utilized in design and construction through a series of historical and problem-oriented projects. Emphasis is placed on research, imagination, problem solving and presentation of work. Students in the costume program also have the unique opportunity to create work for the many school productions throughout the year. Upon completion of the costume program, a student is prepared for employment as a costume/wardrobe professional or as a costume technician in a professional shop. Students may also choose to continue their education in costume design and construction at the university level.

STAGE MANAGEMENT: The stage management curriculum at Florida School of the Arts focuses on building strong communication, organizational and problem-solving skills in all phases of the production process. Practical hands-on experience is gained through participation as stage managers or assistant stage managers for the school's heavy production schedule. Upon completion of the stage management program, students have received the skills and training necessary to either begin their career or seek advanced level training.

VISUAL ART

The Florida School of the Arts Visual Art program has four disciplines of study:

STUDIO ART: Social and technological changes have transformed the way artists work. The studio art program emphasizes fundamental principles through practical exercises while exploring the contemporary discourse that surrounds art and art communities. Studio art students are expected to explore relevant concepts while experimenting with cross-disciplinary practices which include painting, drawing, photography, printmaking, and installation art. Students in the program learn professional gallery display techniques and have the opportunity to show their works in scheduled exhibitions throughout the year.

GRAPHIC DESIGN: The new media design specialization encompasses the use of new technologies in the making of art for both functional and creative arenas. New media involves practices ranging from conceptual and virtual art, to commercial and visual communications. The specialization is a cross-disciplinary field involving computer graphics, photography, digital video, vector imaging and animation.

PHOTOGRAPHY: From pinhole to pixel, silverprint to pigment ink, the photography specialization brings historical perspective to digital technologies. This is confirmed by the belief that teaching essential technical skills, along with contemporary practices and ideas, allows for the broadest opportunities and for the boldest

SPECIALIZATION AREAS CONTINUED

FLORIDA SCHOOL OF THE ARTS

solutions to an evolving medium.

ANIMATION: Today, hand-crafted or computer-generated moving images appear in cinemas, on phones, tablets and computer screens everywhere. Mastering the techniques of animated storytelling is at the heart of this discipline. Every fundamental component is covered in this comprehensive course of study; drawing, 2 - and 3 - dimensional composition, character creation, story development and critical and creative thinking. Such skills are critical to continue toward four-year Bachelors of Fine Arts degree programs or entry-level work in a vibrant and active animation industry.

VISUAL ART (0152)

ASSOCIATE IN SCIENCE DEGREE

The Florida School of the Arts Visual Art Associate in Science Degree has four specializations:

STUDIO ART: This program prepares student artists for careers working with galleries or self-promoting, and/or transfer to four-year BFA programs.

GRAPHIC DESIGN/NEW MEDIA: This program is an interdisciplinary approach to the use of digital and emerging technologies based on a creative convergence of art, science, and technology for human expressions, social communication, and interaction.

PHOTOGRAPHY: Photography has become the ubiquitous medium and common language of contemporary life. In the context of new media, photography students will learn all current methods and application of the discipline as well as being immersed in many formative traditional technique.

ANIMATION: The visually charged world of imaginative and creative storytelling is today often illustrated with fast moving and exciting animated characters. Animation is a highly specialized medium that aspiring young creators should consider as a viable and promising career path. For all artists who desire a means of bringing their artistic visions to life, animation provides a full range of expression limited only by the imagination.
